

Why WellGuard

The WELLGUARD system is superior to conventional systems as it offers the following advantages:

- **Ease of installation:**

Requires minimum working space with light machinery and no dewatering works or diversion.

- **Superior interlocking:**

Superior interlocking system of posts and panels eliminates common problem of exposed gaps resulting in soil loss.

- **Flexibility in design:**

Modular nature of posts and panels allow for flexible design and adaptability to toe protection and channel lining works. In addition, can combine with other MSMA compliant slope protection systems.

- **Cost effective:**

Speedy installation and minimal temporary works save on time and money.

- **Aesthetic:**

Blends in well with slopes creating a stable and harmonious environment.

- **Strong toe:**

Reinforced toe provides maximum protection against scouring and erosion.

- **Proven:**

Tested and proven under the stringent CETU and IKRAM standards.

- **Manufactured locally:**

Local manufacture ensures supply reliability and speedy delivery.
