

AlloyMtd 

ALL WEATHER THERMOPLASTIC

ALL WEATHER THERMOPLASTIC

- AlloyMtd DJ All Weather Thermoplastic (AWT) Road Marking materials are made from a high performance thermoplastic composition. Its core elements consist of a blend of microcrystalline ceramic beads and high reflective index glass beads that are optimized to meet the demands of WET and DRY conditions while delivering with improved reflectivity and durability.
- AlloyMtd DJ AWT road marking materials are manufactured in strict compliance to BS EN 1436: 2007 + A1:2008 and BS EN 1871:2000. The product is a SIRIM certification scheme and ISO: 9001:2015 certifications.
- With over 30 years of manufacturing experience, AlloyMtd DJ AWT road marking materials are used on local, state and federal roads. It is also a proven choice in the international market with various countries such as Sri Lanka, the Middle-East, Indonesia, Vietnam, Singapore, and Cambodia making it their preferred choice.

AlloyMtd DJ All Weather Thermoplastic Road Marking Benefits

- High durability
- High visibility
- Fast drying time
- Road safety guide

AWT Applications

- Night
- Night (Raining)
- Day
- Day (Raining)

Technical Highlights

| Technical Highlights | |
|-------------------------------------|--|
| Compliance | BS EN 1436: 2007 + A1: 2008 (Road Marking Performance for Road Users). BS EN 1871: 2000 (Physical Properties) |
| Skid Resistance Value | >SRT 45 |
| Luminance Factor on Dry Conditions | $\geq \beta$ 0.60 |
| Retro-reflection on Dry Conditions | \geq RL300 |
| Retro-reflection on Wet Conditions | \geq RL75 |
| Retro-reflection on Rain Conditions | \geq RL75 |
| Normal Thickness | 2mm-3mm |
| Heating Temperature | 180°C – 230°C |

Certifications

- SIRIM certificate: BS EN 1436: 2007 + A1: 2008
- SIRIM certificate: BS EN 1871: 2000
- SIRIM certificate: ISO 9001: 2015
- IQ Net Certificate: ISO 9001:2015
