

GAMRON INDUSTRIES

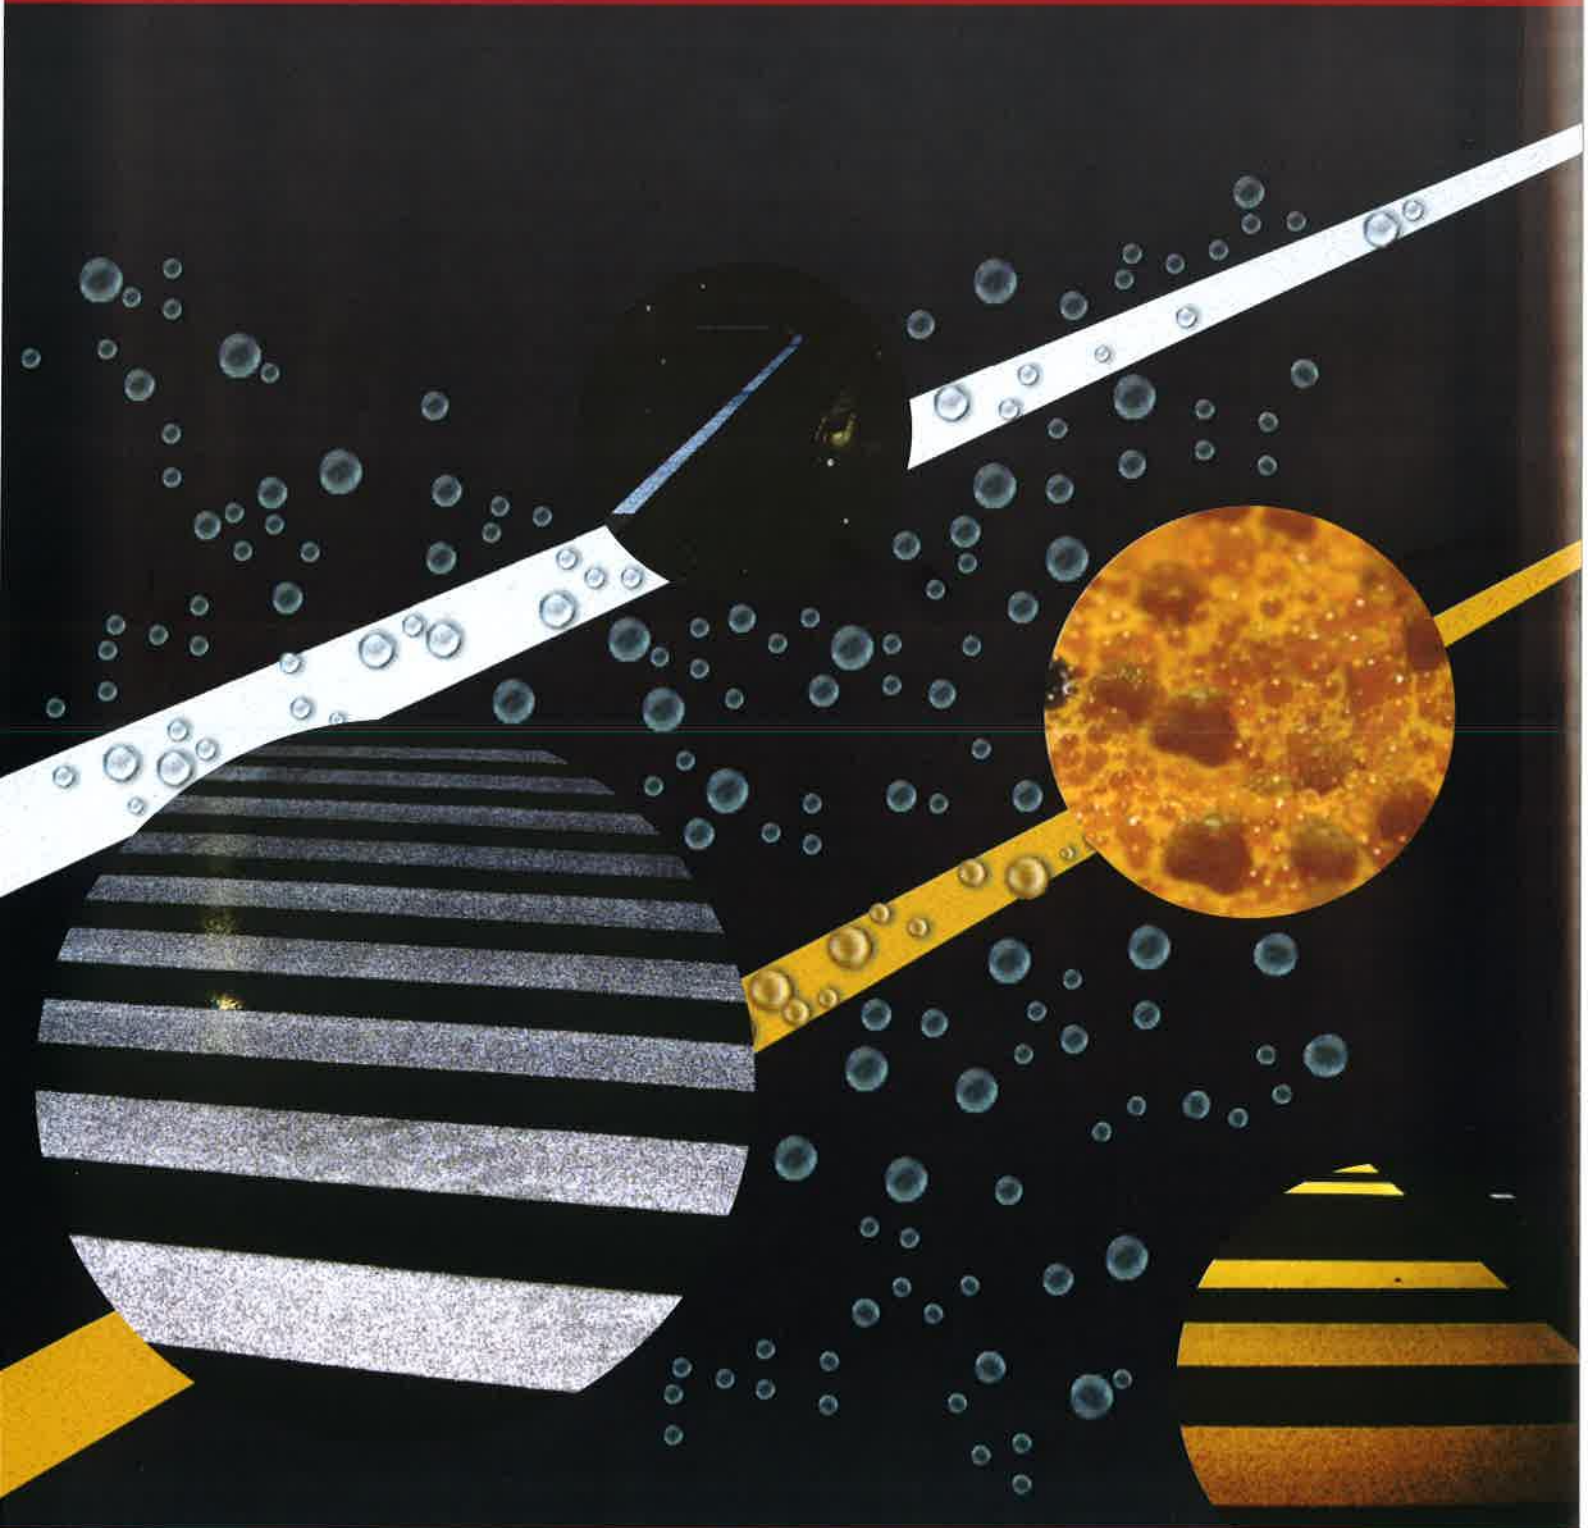

Road Marking Solution Specialist

BOND SERIES

BondLine **AWT**

Screed Method

High Performance Reflective All Weather Thermoplastic Road Marking Materials

PRODUCT INFORMATION

BondLine AWT Screed Method

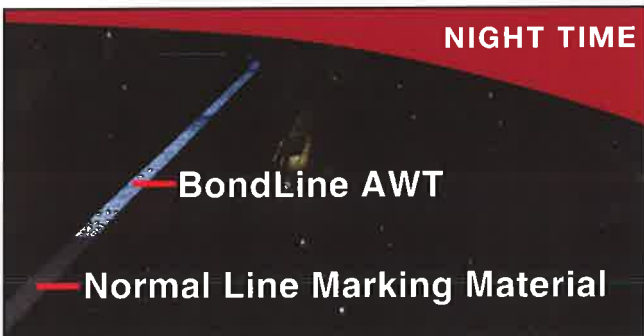

High Performance Reflective All Weather Thermoplastic Road Marking Materials

Description

Gamron BondLine All Weather Thermoplastic (AWT) is a durable thermoplastic intermixed with core elements, consisted of a blend of microcrystalline ceramic beads and high refractive index beads. It is applied using conventional screed method.

BondLine AWT provides high visibility in dry and wet conditions. It performs exceptionally well at night, especially during wet and raining conditions.

Technical Highlights

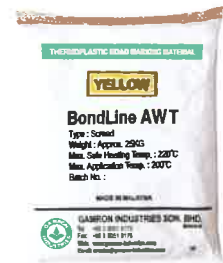

Compliance	BS EN 1436 : 2007 + A1 : 2008
Skid Resistance Value	≥ SRT 50
Luminance Factor on Dry Condition	≥ β 0.60
Retro-reflection on Dry Condition	≥ RL 300
Retro-reflection on Wet Condition	≥ RL 150
Retro-reflection on Rain Condition	≥ RL 100
Normal Thickness	± 2.00 mm
Heating Temperature	180°C - 220°C

Material Benefits

- ✓ High durability
- ✓ High visibility
- ✓ Fast drying time
- ✓ Road safety guide

Colours

White	Yellow
