Marking the future with you

# Classic versatile thermoplastic road markings

ThermLite® is our versatile, high quality and cost-effective thermoplastic road and pavement markings material. ThermLite® is available in specific standards and non-reflective grades.

ThermLite® is available to suit specific climatic conditions throughout the world and in a range of grades to suit client requirements.

ThermLite® is available in various grades that can be used for both extrusion and screed application.

## Developed for rural roads and highways

ThermLite® is Intended for areas from normal to high traffic load, making it ideally suited for rural roads parking zones and highways providing a durable and excellent performance marking.

## Packaging for woven and melttable bag

ThermLite® is available in bag of 20/25 kg melttable bag and 25 kg woven bag. The packaging for the 20/25 kg melttable bag is part of the binder in the material and is added directly into the kettle. Still, there is no need to add extra binder, when using the 25 kg woven bags.

## Benefits and Features

- Designed for regular and profiled road markings
- For screed or extrusion application methods
- Ideal for medium and high trafficked roads
- Grades to suit a range of climatic conditions
- Made with natural components and organic pigments

## Environmentally friendly

ThermLite® is an environmentally friendly thermoplastic road marking material. The natural components and the organic pigments in ThermLite® are not harmful to the environment.

## Consistent quality with every bag

A primary element of our quality assurance is the certification according to ISO 9001 and ISO 14001.
